Key words: *independent learning, English, innovative , technology , learning technologies, interactive method. independent learning, English, innovation, technology, educational technology, interactive method, communication, mooc, moodle, blogging, textbook.*

INTRODUCTION

Lack of practice in a foreign language is one of the most important factors hindering learning it. This problem can be solved by talking to yourself in English about everything at all times. We don't need an interlocutor either, we just don't want to give up. For example, when you go to work in the morning, you repeat to yourself in English: "Now I wear trousers and a shirt, I put on shoes, I close the door, I take a taxi" ("Now I wear my pants and shirt). , I put on my shoes, lock the door, stop the taxi ") and so on.¹³⁶

Practice thinking in English as you would in your native language. If you don't know a word or can't think of a word, use translation software or Google Assistant. In this way, you will learn to express ideas correctly, memorize new phrases, and feel free to communicate with a real interlocutor in the future.

Today, most internet users have their own blogs, Instagram, Facebook, Twitter pages and groups. This also contributes to language learning. For example, you can run 2 different pages at the same time: in Uzbek and in English. It doesn't really matter if you post long posts, the key is to do it regularly, for example once a day. Through this, you will learn to spell words correctly, express ideas "on paper" and communicate with observers.

In addition, a foreign language channel can attract more users and bring you popularity.

Another way to start speaking English is to use the services of virtual assistants: Google Assistant, Siri, Amazon Alexa and Google Cortana. They not only provide you with the information you need, but can also engage in dialogue. Using them on a regular basis, you will communicate in English, ask questions and try to understand the answers. The main advantage is that you learn to speak correctly in pronunciation.

Daily thinking is an effective way to learn a foreign language. Buy a nice notebook and write in English about your dreams, thoughts, tasks every day. Whether it consists of 5 simple sentences or has grammatical errors, you will increase your growth rate in this case. Don't be afraid to go astray, look at the diary as a friend who understands you even with your shortcomings, and try to express the flow of your thoughts non-stop. Your goal is to learn to write in English.

Audiobooks are a favorite friend of book lovers who don't like to read (yes, they do). It is impossible not to acknowledge their help in learning a foreign language. An audiobook is a great help in listening and understanding a foreign language, understanding the meaning of unfamiliar words, and shaping speech.

An audiobook based on your level of knowledge select. For starters Huckleberry Finn or Oliver Twist compatible. Researchers with an intermediate level of knowledge are interested in Francis Eliza Burnett's "Mysterious Garden" (The Secret Garden) or Jerome K. Jerome's "Three Men in a Boat" (Three Men in a Boat).

There are many sites available today that allow you to listen to and download audiobooks for free:

Loyal Books;

LibriVox;

Scribl;

Free Classic Audio Books.

It is even possible to continue learning English during a short break or vacation. With the help of Wikium or Learnenglishkids mini-games you have the opportunity to grow your memory, respond quickly and improve your attention. Select the English version of the site and complete the tasks. Solving puzzles will require you to quickly memorize English words and terms, in return for which you will be able to play your favorite computer game in English. This method helps to both relax and acquire knowledge at the same time.

Another effective way to learn a language is to watch English series along with their under-the-frame recordings. It helps to hear and understand a foreign language, to master the spelling and correct pronunciation of new words.¹³⁷

You can also choose them depending on your level of knowledge. There are more than enough sites on the Internet for English-language movies and series. To get started, we recommend the following:

Ororo;

Show-English;

Lingualeo.

Songs are a great tool for language learning. Singing with a favorite singer or band can help you memorize words, understand content, and improve pronunciation.

You can find many lyrics on these sites:

Online Teachers UK;

Lyrsense;

Native English.

¹³⁷ Birdsong D., Bialystok E., Hakuta K. Second Language Acquisition and the Critical Period Hypothesis. - L. : Lawrence Erlbaum associates publishers, 1999. - 182 p.

You can also use Shazam. It not only searches for songs, but also gives you the opportunity to sing with the performer, providing lyrics. The computer is the main helper in learning the spoken language. On the internet you will find forums in English where you can “get” new words and even start a conversation. Where, if not on the forum, you can learn new phrases for personal vocabulary and popular vocabulary used by native speakers.

In addition, the grammar used in daily life with easy communication can be observed here.

Custom books are not as often used as online publications. The purpose of this teaching method is to master English grammar independently through thematic exercises. However, such guides are rarely of interest to beginners because they do not have an army of fans.

If you want to not only understand the basics of grammar, but also enjoy the lessons, it is better to choose fiction with a ready translation into Russian.¹³⁸

No one would argue with the ruling that the best way to learn a language is to communicate with native speakers. It doesn't matter that there are no such acquaintances who are fluent in English and no plans to visit this country in the near future. Thanks to the internet, this can be done without leaving home.

All you have to do is visit the sites created specifically for language exchange:

rosettastone.com is a team that brings together teachers, students and ordinary people who want to learn spoken English, as well as native speakers. There you can easily communicate with other users, do exercises and evaluate your work. In addition, the site allows you to record an audio file with other user comments and correct your pronunciation.

italki.com is a website designed to communicate between people all over the world. There you can find an interlocutor who will be happy to help you learn English in person.

speaking24.com- A resource that allows you to communicate with native speakers using Skype. The goal of users is to know English perfectly and learn to replace words with others if necessary.

CONCLUSION

The basis of language learning is structure. Change your habits as we have been taught and you will soon notice its effect. Your vocabulary, pronunciation, and listening comprehension are guaranteed to increase. In addition, these recommendations do not require much time and effort. Practicing an oral conversation with an English speaker is an important stage of learning that is beneficial for both beginners and someone who has reached a certain level.

How is it possible to understand that the level of knowledge of oral English is achieved after so many hours of reading? Correspondence on forums or video chats with native

speakers and just polyglots can help. Language constructions begin to take shape in the head, something is laid on the head, and then it begins to appear during conversation.¹³⁹

If the brain stops thinking in Russian and switches to English, it is a direct indication that the training is not in vain and that the end goal is almost achieved.

The key is not to stop here and continue to improve your spoken English.

English is not one of the most difficult languages in the world, although some people are given a textbook with grammar exercises. People learn English over the years and can't get to the level they need. A few tips will help speed up the process and achieve results that improve the language as soon as possible.

The key is to practice regularly and dive into English-language resources, mastering new knowledge like sponges. Adults learn a new language almost as easily as children. This is confirmed by many studies.
