Annotation *This article highlights the definition of distance learning. Additionally, it addresses its positive and negative effects and the attitude of students around the worldwide.*

Key words *Distance learning, technologies, communication, main elements, , foreign languages.*

Distance learning refers to any education provided without the teacher and students being physically present together. In overseas, highschoools and universities offered correspondence courses as a method of distance learning.

Distance learning also called distance education, e-learning, and online learning, form of education in which the main elements include physical separation of teachers and students while instruction and the use of various technologies to facilitate student - teacher and student - student communication.

Distance learning students are different from traditional students, as these students include in a full time position, foreigners, individuals who are from remote regions that they do not have any access to attend lectures. As their needs, they are studying this type of education.

Additionally, because, our today's world is highly dominated by technologies, it will be possible to learn something new at home or your own room. Firstly, it could be seen the one way of conducting at Universities. After that, this process follows by small private lessons which conduct online to teach applicants about a subject or matter. Especially, this way is popular amongst teaching or learning foreign language stuff. As this matter is the most popular one.

Furthermore, e-learning has been an established section of the educational world, with trends pointing to ongoing growth. For example, in USA, higher education alone , more than 5.6 million university students were enrolled in at least one online course in the autumn of 2009, up from 1.6 million in 2002. The given fact can be justification of distance learning and students attitude toward distance learning. Moreover, it is approved by Universities. Because, Universities can get benefit by adding students without constructing any classrooms and housing. As for students, they obtain advantages of being able to work where and when they choose.

Looking at distance learning, it obtains both positive and negative sides. Positives of distance learning:

- saving up time

- access to learn in every time and place
- learning independently
- saving up budget
- access to learn something new again and again
- flexibility.

Negatives of distance learning are

- lack of competitiveness
- harmful for eyes
- not preferable those who are not able to learn independently
- lack of discipline
- lack of communication amongst students.
