Annotation: *On December 29, 1993, January 14 was declared "Defenders of the Fatherland Day" in our country. It is known that from the first years of our independence, the issue of strengthening our country's defense was defined as one of the most important priorities of our country's policy. The decree on the establishment of the Ministry of Defense laid the foundation stone for the work in this regard. Later, it was transformed into the Ministry of Defense. On January 14, 1992, another important event in the history of our independent country took place. The Supreme Council of the Republic With the decision "On military units and military training institutions located in the territory of the Republic of Uzbekistan", all military structures in the territory of our country were transferred to independent Uzbekistan. opened the way for the development of the term program. On December 29, 1993, January 14 was declared "Defenders of the Fatherland Day" in our country.*

Keyword: *Today's Armed Forces, our army, our country, independence, defenders, modern, security, homeland.*

Today, life itself requires extensive use of modern information and communication technologies in the system of management, planning and application of the Armed Forces, the harmonization of information management tools and military communication systems, and the creation of a single digital network of information and communications of our Armed Forces. In the gradual and systematic formation of our national army, first of all, the geostrategic and geopolitical position of Uzbekistan in our region and in the current world, the serious internal and external threats and dangers aimed at the security of our country, especially the growing and active international terrorism, extremism, We took into account such disasters as the ever-expanding narco-aggression and proliferation of weapons of mass destruction. Our army embodies the best practices of world military construction, and at the same time continues our national combat traditions with high fidelity, while at the same time, the military actions and combat operations that are likely to take place in our region is also being taken into account in every way. The educational system in our military educational institutions is undergoing a radical change, training and education of future officers in them is based on completely new educational, technical and moral principles that fully meet the requirements of the present time. established on a moral

basis. First of all, brave and devoted, intellectually educated mature personnel who are determined to serve our independent and sovereign Uzbekistan, to protect its interests and borders, and the peaceful and peaceful life of our people, will enter the ranks of the army.

Thanks to the large-scale reforms carried out during the past period, it is compact, fast, organizationally perfect, capable of reliably protecting the security of our country, the inviolability of our borders, and preventing any malicious attempts against the peaceful and peaceful life of our population. our national army equipped with modern weapons and military equipment was formed.

Today, the sons of our country are following our great grandfathers. When we think about the spiritual world of our great ancestors, it is natural that we should pay special attention to our grandfather Sahibqiran Amir Temur, who is known and famous all over the world. Because this classic figure, a symbol of determination, bravery and wisdom, established a great kingdom, left a practical and theoretical legacy in terms of statecraft, opened a wide path for the development of science, culture, creativity, religion and spirituality. . From the above opinions and evidence, it is clear that the statesman was very enterprising from his youth, a person who knows how to do things, he especially well mastered the subtle secrets of management, which are difficult for many to understand. His interest in the state and military affairs in his worldview was awakened from his youth. Scholars examined it and praised its power. By the time he's twelve, he'll: Withdraw from childish games and try to spend time with peers.

At the age of 16-18, Temur mastered the art of swordsmanship, spearmanship, and hunting, and at the age of 20, he became a skilled horseman. Then he divides his equals into groups and begins conducting combat exercises. Until the age of sixteen, Sahibqiran knew not only religious, but also worldly sciences - history, philosophy, geography, arithmetic and other sciences. The great commander made a great contribution to improving the country's prosperity, improving the economic lifestyle of the population, and ensuring abundance. To this, the great Amir Pirlari Zayniddin Abubakr Toybadi mentioned the four things in the affairs of the kingdom: 1. Council; 2. Counseling; 3. Strong decision, entrepreneurship and vigilance; 4. Achieved due to the practice of prudence. We can know this from the words of Amir Temur, who said, "I accomplished nine parts of all my work with councils, events and consultations, and the remaining part with the sword." , he defended justice, fought for justice and religion. In most cases, the wars that arose were fought by Amir Temur because of the injustice, dishonesty, and lack of faith of his opponents. Today, the military art heritage created by Sahibgiron is worthy of the military art heritage of the world nations. took place and is enriched with the new content of today.

The homeland begins at the threshold, from the corner where a person lives and breathes, from the soil of the house where the blood of a person's umbilical cord was spilled. Therefore, love and loyalty to the mother earth, where a person first breathed

and grew up, It is both a duty and a duty for him to rub every handful of sacred soil in his eyes like a parrot, to live with a feeling of filial piety towards him for a lifetime. Every inch of land on the soil of our country is considered sacred. That's why our ancestors saw the soil of the country in their eyes and breathed the memory of the homeland wherever they went. People of our country cannot find happiness outside of our country. Each person's homeland is the most beautiful and sacred place in the world for him. A person who has no love for the country cannot be believed if they say that he has love for his parents. It educates feelings of loyalty to our motherland, interest in the heritage of ancestors, enjoyment of national spirituality, self-confidence, and responsibility for the future. The purpose of holding "Defenders of the Fatherland Day" events in educational institutions is to teach students to protect the potential and reputation of the Armed Forces of our Republic, the independence and territorial integrity of our country, the peaceful life of our people and the creative work to strengthen independence. , to widely shed light on the importance of educating the young generation in the spirit of patriotism, to educate them to be loyal and selfless people to their homeland, has become one of the most important tasks of the pedagogical team of all educational institutions. forming the main directions of national ideals such as the perfect person, social cooperation, further improvement of spiritual and educational work in these educational institutions is becoming a tradition. The peace of our country and people and reliable protection of peace, today is becoming the dream and duty of every young man and girl.

Today's young people are the guardians of our independent homeland. If we raise the representatives of the younger generation to be well-rounded and mature people, if we consistently form honor and national pride in each of them, then our homeland will become such a powerful country. The future of our independent country is our young people, who live with the feelings of reliable protection of the homeland, the peace and tranquility of our people, patriotism, loyalty and self-sacrifice. Every person living in our holy land, regardless of nationality, religion and belief, should be rightly proud of such achievements we have achieved.

Despite the impact of the global economic crisis, we consistently continue our systematic work on social support for our military personnel and their family members, beautification of military towns, and construction of modern infrastructures.

In addition, many new jobs have been created for family members of military personnel. More than 3,000 military pensioners were employed. More than 1,000 children of military servicemen were given state grants for their education in higher educational institutions.

There is no doubt that in the "Year of Youth Support and Public Health Promotion" we will strengthen our work in this regard and take it to a completely new level.

At the recently held Youth Forum of Uzbekistan, in our Address to the Oliy Majlis and our people, we clearly defined the measures in this direction.

In new Uzbekistan, we will fully mobilize all our strength and capabilities so that the young generation will grow up to be physically and spiritually healthy, devoted and enthusiastic people to the Motherland, learn from our glorious history and live with pride.

In the current situation, when ideological struggles are intensifying in the world, and various dangers and threats are increasing in the information space, we must all be constantly aware, sensitive, and active citizens.

In particular, our military personnel should strengthen their cooperation with the state and public organizations in order to form ideological immunity in persons and their children who have lost their way and were influenced by foreign ideas and return them to a healthy lifestyle and the right path. .

Dear brave and brave defenders of the Motherland!

Today, at a time when complex conflicts and conflicts continue in far and near regions of the world, we must organize our work to ensure peace and security in our beloved Uzbekistan more efficiently.

In particular, strengthening our defense capabilities, providing the troops with modern weapons and equipment, wide use of information technologies in the management of units, improving combat training and professional skills will remain our priority tasks in the future.

Without a doubt, with our joint efforts, we are fully capable of achieving such noble goals and goals, of preserving the peaceful work and peaceful life of our people, and the clear sky of our country like the apple of an eye.

Dear friends!

Once again, I heartily congratulate you, dear ones, and your family members on the 29th anniversary of the establishment of the Armed Forces of the Republic of Uzbekistan and the Day of Defenders of the Fatherland.

I wish you all good health, family happiness and happiness, great success in your honorable and responsible work.
