Annotation: *there is such a divine word in the world that anyone who mentions it will feel a sense of pride, pride, and pride in the heart of the world.*

This is the word Motherland. This word has many meanings. The motherland is the land where we were born and raised, the threshold where we first stepped, and our holy place of worship. It is the duty of every person living in this country to love him more than his life, to honor him, to protect him from dangers. There is no place in this world more prestigious than the Motherland.

Key words: *Motherland, feeling, loyalty, dedication, independence, our people, hardworking, high, our future, human, creativity, work, mission.*

As much as a person respects and loves his mother, he should respect his country as much. Because our loving mother washes us white from infancy and brings us to adulthood. Our motherland also grows us in its hot embrace. That is why we mention the word Motherland in the name of the most holy person in the world, we honor her as Motherland. Our country is the greatest blessing given to us by God. The sun rising from the east spreads its generous rays on the soil of our country every morning. All four seasons show their beauty and freshness in our country. Our grandfathers shed blood for a handful of soil of our motherland, they protected it like the apple of an eye. As Abdurauf Fitrat said: "The country is my soul and body, my place of worship. It is my month, my peace, my honor, my honor, my Kaaba, my Qibla and my Gulistan."

Our Motherland is a divine gift given to us by the Creator. The homeland begins with the soil of the house where the navel blood of a person is spilled. Therefore, when a person takes a breath for the first time, grows up and has love and devotion to the mother earth, rubs every handful of her holy soil like a parrot in his eyes, lives with a feeling of filial piety towards her for a lifetime. it is both an obligation and a debt. Protecting it like the apple of an eye is the duty not only of the defenders of the Motherland, but also of every person living in this country. When a person comes to this world, he should appreciate the blessings given to him and live in gratitude. Protecting our homeland is a sacred and honorable task left to us by our ancestors. If we look at history, our grandfathers also sacrificed their lives for the Motherland

who fought for freedom and peace. Jalaluddin Manguberdi and Temur Malik sacrificed their lives to protect the motherland from Mongol invaders, while Sahibgiron Amir Temur did great things for the well-being, prosperity, and peace of the Motherland. Our grandfathers, like Mahmudhoja Behbudi, Abdurauf Fitrat, Abdulla

Qadiri, Cholpon, Abdulla Avloni, Munavvarqori, were martyrs for the future of the nation, freedom and development of the country. We should learn to protect our motherland and preserve it from the activities of these people. The exemplary life of these nobles is an example for today's youth. Today's youth should always be ready for the defense of the motherland. The peace and well-being of Uzbekistan, which is rapidly developing during the years of independence, is in the hands of us, the young people who are the owners of the future. The issue of security is expressed in the fifth paragraph of the "Strategy of Actions for further development of the Republic of Uzbekistan" adopted by the initiative of the President of our country, Shavkat Mirziyoyev. Today's youth should serve their ancestors in the way of security and peace of the country. January 14 "Defenders of the Motherland" Day, which is widely celebrated in our country every year, is a happy holiday aimed at realizing the value of our leisure days and strengthening the love for the motherland in the hearts of every citizen. The First President of the Republic of Uzbekistan, Islam Abdugyanevich Karimov, in his works "Our national army is a strong guarantee of our independence, peaceful and peaceful life": "Defenders of the Fatherland Day is celebrated not only by military personnel, but also those who returned from their duty in the ranks of the army We should accept it as a happy holiday for our compatriots and thousands of our children who will go to the service tomorrow, and we should celebrate it on a high level, like the greatest and dearest holiday - Independence Day," he said. Our grandfathers left us such a homeland. They dreamed of medicine-free days like today. How fortunate that we live in such days. That is why every citizen should protect his homeland, the motherland where he was born and raised. This is an honorable duty that we inherited from our ancestors!

The great writer Gafur Ghulam quotes the following lines in his poem "To the Boys":

"Guys are the praise of nations, behold,
The jewel of the generation, the support of the state.
The prosperity of the country, the reason for weddings,
The roar of the crowd, joy, joy,
As long as the boy survives, there is no danger!"

In fact, young men are the support and protector of the country, the nation. Only young men who sincerely love and honor the Motherland, who have a burning feeling of love for the Motherland in their hearts, are worthy of the honorable name of a true defender of the Motherland.

They serve earnestly to fulfill the duty of youth to their country. Day and night, they guard the borders of our country. Even today, there are many brave and courageous soldiers who sacrificed themselves for the peace of their country. They died doing their boyhood duty. One of such brave soldiers is Botir Valiyev, a hero from Velvet. He was killed while fighting against criminals who were trying to illegally cross

the border of Uzbekistan from Kyrgyzstan. The sacrifices of Batir Valiyev and brave soldiers like him will never be forgotten. After all, those who gave their lives for the defense of the Motherland will live forever in the memory of the people and the nation!

If we, the modern generation, grow up to be perfect and mature, if we consistently build honor and national pride in ourselves, our Motherland will become such a powerful country. It is the honorable duty of every person living in our heavenly Uzbekistan to reliably protect the homeland, the peace and tranquility of our people, to be a patriot, to live with feelings of loyalty and self-sacrifice!

We all know that any development - be it religious, social, economic or family development - is based on one thing - peace and tranquility.

When our grandfathers and grandmothers prayed, they used to say: "Give me peace, calmness, and peace of mind." Because peace is one of the greatest blessings of God to humanity. Our Prophet, may God bless him and grant him peace, also emphasized that peace is a great blessing in his blessed hadiths and says:

"There are two blessings that most people lack: health and peace."

Of course, every reasonable person should be thankful for this blessing. There are some blessings that can be thanked by saying Alhamdulillah, but the blessing of peace cannot be thanked by saying Alhamdulillah. To preserve this blessing, we must fight on every front, first of all in the field of enlightenment.

There are professionals who provide us with this peace and quiet, who make an incomparable contribution to our peaceful life, and we should always recognize their services and remember them. We should also specially recognize the services of the leaders of our government, who have been restoring good neighborly relations with neighboring countries and skillfully implementing diplomatic relations in the political arena of the world.

Alhamdulillah, there is our National Army - the Armed Forces of the Republic of Uzbekistan, which has been providing the borders, territorial integrity, peaceful life of the population and its security for 30 years day and night. Our Prophet, peace be upon him: They said, "Guarding the borders of the Motherland one night for the sake of Allah is better than the reward of fasting during the day and praying at night for a month."

The Messenger of Allah, may God bless him and grant him peace, said: "For the sake of Allah, guarding the borders of the Motherland for one night is better than the world and everything in it."

Also in another hadith:

"There are two eyes (owners) that will not suffer in hell: the eye that cries out of fear of Allah, and the eye that keeps watch all night for the sake of Allah." They gave good news about how great the reward is for protecting the peace of the citizens and the borders of the Motherland, and for those who spend the night awake in this service, they will be given a great reward - safety from the fire of hell.

Today, there are categories that do not see the peace of our country. Some of them use the words "human rights" and "democracy" as a shield to achieve their

political goals and try to create a conspiracy in the country, while some of them use the holy slogans of our holy religion as a shield for their own purposes and sow conspiracy in the society. They are trying to spread it. However, Allah the Exalted blesses in His Word:

"Conspiracy is a greater sin than killing." (Surat al-Baqara, verse 191.)

The sin of igniting the fire of sedition in a region is more serious than the sin of killing a person. Because the harm of a murderer ends with the loss of one person's life, but the harm that comes after the plot of a conspirator does not end after years have passed. Also in another verse:

That is, "Prayer turns away from obscene and evil (sin)" (Surah Ankabut, verse 45).

If our faith and prayers do not prevent us from actions that are considered obscene, actions that cause sedition in society, then there is a doubt that we are believers and that our prayers are acceptable.

In fact, our country pursues a policy of peace and mutual respect and is doing great work to preserve peace in its territory and in the territory of neighboring countries. Today, people living in Uzbekistan live peacefully and are busy with their daily worries.

The great Sheikh Alikhan Tora Soguni, may God bless him and grant him peace, says: Four things are proof of the honor of humanity and the integrity of its destiny: 1) Freedom, liberty and freedom; 2) Self-ownership of wealth earned by labor; 3) Living in the native land of the mother; 4) Belief in Islam, the pure and holy religion.

According to Alikhan Tora Soguni, whoever has these four things, that person is happy and blessed. According to this criterion, the people of Uzbekistan are literally happy. May Allah the Exalted make our homeland, the peace of our borders, the purity of our sky, and a peaceful and peaceful life stable in the world. May our peace be stable and our independence be eternal.
