

HOW FAR SHOULD THE DISTANCE BE BETWEEN TEACHERS AND STUDENTS?

Musurmonova Mohinur Shodmonovna*2nd grade student of SamSIFL*

Abstract: *This article describes how far the distance between teacher and students should be, relying on the opinions of students, teachers and net resources in order to boost the unity of teachers and students what is the one of the best methods of rising education in higher educational establishments.*

Key words: *teacher, student, distance, higher educational establishment, method, institute, university.*

There are a lot of thoughts about how far the distance between teachers and students should be. In order to know the exact space via telegram messenger online survey has been organized. Moreover, we got some comments on teachers from students about the topic. Now it is preferable to mention what the famous think about teachers, advice for students and about lesson. One of the greatest people in his time Bill Gates says, “Technology is just a tool. In terms of getting the kids working together and motivating them, the teacher is the most important”, “Don’t let what you cannot do interfere with what you can do.” —John Wooden, “Change is the end result of all true learning.” Leo Buscaglia.

Firstly, it was a good opinion to be aware of students` ideas about their distance between their teachers and in what way teachers can be close to students.

Undoubtedly, being near with students, teachers are able to obtain respect what can led students to study improvement for beloved teachers` sake, for this reason they undertake their responsibility with pleasure, so try not to be late and do the home tasks on time. When asked from students from 90 just under the half of them showed their wishes to be as friends with teachers while 25 per cent voted for ‘as parents’. However, a fifth per cent would not like to have distance as a small number was for ‘as president` according to the rest of the question it became precise that the students in Samarkand state institute of foreign languages are highly willing to improve their knowledge because about three-fifth of them indicated that the best and useful teachers are the teachers who keeps the normal distance and assists them for study and research improvement, in turn, it should be noted that when asked about helpful teachers namely tutors was voted by 34 % by volunteer students. Furthermore, being interested in learners` interests and the aid to tackle their problems contribute to be close with students significantly.

Several students were glad about being asked about their beloved teachers, so the question was given:

- About which teacher can you tell who is like your friend or parents and his or her lesson was more effective?

- Without any hesitation, I vote for Chehrangiz Salimova and Guli Habibulayevna because their attitude towards us is friendly, except for this, exchanging ideas is wonderful too. They are always ready to help us, so, I love their figuring out lesson and teaching methods.

- Ok, I can tell Chehrangiz Salimova, who is full of emotions and always positive. I love the teacher.

To comment on lovely teachers cheered their mood up. Their smiley face how far they look up to teachers, so we decided to talk with Chehrangiz Salimova and tutor Mehribon Erkinovna.

- Have you ever been on a good relationship with students and what is your opinion about this?

- Well, we should be good with them, maybe like parents because when they adore you they tend to enhance their involvement in learning process

- What can say about being like friends?

- Ok, being crony may exaggerate the position, That`s why I try to be in the middle and my learners have never done something wrong.

- Thank you!

- Thank you too!

We turned to Mehribon Erkinovna.

- To my mind, in the lesson I mean all should be in order. Despite this, out of classroom we are close and we must seek solution to their problems.

As mentioned above, tutors have enough contribution towards development of students` study and satisfaction with institute. The reply of Mehribon Erkinovna is a proof for that.

Lastly, It was turn to know what methods other teachers use. From 12 teachers 42% are students` friends, appreciating their wishes. In the equal level other teachers try to be like their parents whereas there are such kind of teachers are not close at all. In the next question `How do you get students respect to you?` Seeing the votes, it was clear that three-quarters support students with their useful suggestion which is for their bright career. 17% are acting looking at students` interested sphere as the teachers are available who just teach their own subject including 7 per cent.

To compare with other people`s notions about this we searched the web:

- When teachers are friendly with the students, they feel a sense of importance and feel like they are being heard in the classroom. When students feel like their opinions and ideas matter, it boosts their confidence and creates the world of good. Trust is a key factor in every relationship. When students trust their teachers, they are more likely to follow your instructions and any advice you have for them. Forging a friendly relationship with your students the fastest way to win over their trust.

Taking into all sides including teachers, students and net sources it can be concluded that: Being overfriendly is nor a good way, hence, teachers should not be only a good teacher but also should they be study parents whom they believe in.
