

## MODERN METHODS OF TEACHING ENGLISH TO PRIMARY SCHOOL CHILDREN

Saypillayeva Mohinur

*2-course student of Samarkand State Institute of Foreign Languages*

**Abstract:** *Interest in teaching foreign languages after our country gained independence increased and many opportunities were created for young people. Our first president Islam Karimov said, "Foreign languages are currently being taught in our country great importance is given. This is certainly not for nothing. Today the world community for our countries that are striving to take their rightful place, foreign is building its great future". In this article, given the great importance for English language and the innovativeness necessary for their study technologies are highlighted. Furthermore, we learn teaching modern methods to primary school children.*

**Key words:** *modern methods, study technology, creativly problem, warm-up exercise.*

Teaching foreign language in our republic, knowledge of foreign language teachers and according to the recommendations of the European framework for the assessment of skills (CEFR), new methods and requirements were developed. The demand for learning a foreign language is increasing day by day. Foreign language science is divided into four aspects (reading, writing, listening and speaking) separate concepts and skills are given for each of them. Education technologies, it is productive of modern information technologies in the educational process is to use. Also modern innovation in the educational process means to increase the quality and efficiency of education by introducing new technologies holds. Language learning and the role of modern technology in teaching is incomparable. From technological means use every aspect of learning a foreign language (reading, writing, listening speaking). For example, to listen and understand, of course, a computer, player. This process is impossible without CDs. Listening comprehension language is one of the most important parts of learning. In this, the student is at the same time the speaker's pronunciation, adherence grammatical rules, vocabulary and his it is required to pay attention to its meanings. Modern in the educational process students are also informational and communicative in the use of technologies good knowledge of technologies and the ability to use them is an important factor. At the heart of any game is generally accepted education principles, tactics should lie. Educational games are based on educational subjects should be taken. In the process of games, the student is more interested in this activity than in a regular lesson is more interested and works freely. It should be noted that the game is a way of teaching. Pupils participate in game lessons with interest, they strive to win, and the teacher educates the student through they will give. The student can listen and understand while playing English games and speaking. They believe that they can learn and write

and they interest. At present , the education system is further developing with modern technologies. Focusing on more interactive methods will further develop the educational system. One of the most important requirements in language learning is to teach the student to think independently.

Today, english teachers in the United States, from the following innovative methods based on the experience of English pedagogues are using: - "Creative Problem Solving". To use this method, the beginning of the story is read and how it ends the verdict of students is referred to - "Merry Riddles" (Merry Riddles) teaching riddles to students is important in teaching English important, they learn and think about words that are unfamiliar to them find the answer to the riddle; - "Quick answers" lesson helps to increase efficiency; - "Chigil yozdi" ("Warm-up exercises") using various games in the classroom to make students interested in the lesson. "Pantomime" (pantomime) is a method where very difficult topics need to be explained used in class or written exercises when students are tired will be; - "A chain story" method of students' oral speech helps in growing; - "Acting characters" is a teaching method can be used in all types. "Interpreter" for training Professionals such as "Translator", "Writer", "Poet" participated in the class they can talk with students. "When pictures speak" method is very convenient for teaching English, student, helps in the development of students' oral speech, for this pictures related to the topic should be used; - "Quiz cards" cards are distributed according to the number of students and all students at the same time allows you to participate in the lesson, which saves time.

Teaching a foreign language to primary school students is a difficult and responsible task. We can use the following methods to make the lesson meaningful and interesting for them:

**Remembering by sight.** It is known that young children have heard he remembers the objects he saw more than his information. Therefore, lesson through various visual aids, posters, visible and everyday something that is often used in life, teaching new words by writing on objects and making sentences with the participation of the new words learned. For example, book, table, writing on blackboard, pen, window, etc. Diary such things that are often used in life are always visible and because it is always used, the child learns these words involuntarily.

Words that are difficult to understand or remember through songs and poems sing to music. In addition to remembering new words, the child's speech speech also develops. An example of this is children's singing of the English alphabet learning can be shown to be more effective than mere memorization.

**Teaching through cartoons.** It is known that children like different cartoons interested to see. And in the process of watching cartoons in English, in the cartoon. Although they do not understand the words, they through the actions of the cartoon characters seeks to understand the words they use. It is interesting and language for children effective way for them to learn.

**Learning through fun games;** Different in English language teaching the role of teaching through games incomparable. Playing various games during the lesson standing increases enthusiasm for learning science in the classroom, not being active it also encourages students to participate better in classes. The following games can be an example of our word.

**Mixed technique.** Here we voluntarily use different techniques we can combine. For example, children play games, sing songs, draw can draw, show new words through different actions. The advantage of the technique is diversity. In this, the reader is limited by only one thing won't stay.

In fact, language learning through the senses is more useful than other methods and is effective. For example, in the process of tasting a single apple, the student knows its color, taste, size, smell and also tells its English name. As a result, if the teacher asks the children the English name of the colors, the children he immediately remembers when he ate the fruit. Therefore, the use of such methods is up to the reader helps to retain information in memory for a long time.
