

Nazarqulova Mashxura

3rd year student of Jizzakh Pedagogical University

Botirova Hakima

Scientific supervisor

Annotation: *This article is on the topic "Lesson, its types and structure".study of existing pedagogical literature and scientific organization of the lesson basics, educational tasks of the lesson, enrichment with information, new introduction of technologies and consideration of social and personal needs, enlightening the scientific and skillful conduct of the lesson in more depth is to give.*

Key words: *Pedagogy, thinking, laboratory, knowledge, competence, graphic, skill, idea, perception, element, grammatical, didactic*

Approaching one's history based on a new way of thinking, our great ancestors It is great for studying the rich cultural and spiritual heritage left behind opportunities were created. At the same time, our national pride is back restored. In our republic, science is science, including the science of pedagogy is rising to its new stage of development [1-4]. In the past restoring the fame of the geniuses of pedagogical thinking, their ideas many great things are being done, such as applying it to people's life. Our great grandfather Abdulla Avloni said, "Education is either life or death for us it is a matter of death, or salvation - or destruction, or happiness - or disaster." they didn't say it for nothing. This is the opinion of our country, the Republic of Uzbekistan, which is currently building a democratic society and building a great state serves as a special slogan for [5-8]. Extensive pedagogy education in the sense is directed to a certain goal, society persons or teachers, tutors prepared by carried out by, various training sessions, special includes a number of educational activities. Many people scientists mean education only to educate a child. this is the idea is a rather narrow concept. Because it is not only children who need education, but adults need it too. Nowadays, some of our young men and women as well as actions contrary to the rules of decency and morality of adults we can see that

1. So, pedagogy is a person it is needed from infancy to the end of life. With that together, teaching about the manners of life and analysis and research of these things it can be said that it is a performing science

2.The following is about studying the topic of the lesson, its types and structure was defined as the main task [9].

1. Ya. A. Comensky's views on the organization of education. His Some characteristics of the worldview are the influence of Renaissance culture to study the activity of emergence under.

2. The class-lesson system used in the current education process. In-depth study of the fundamentals of the subject studied by students during training acquisitions, his perceptive abilities and spiritual and moral qualities to learn the duties of upbringing.

3. The importance of the lesson in the development of a perfect personality and is updated modern lesson features according to the requirements of pedagogical thinking study

4. Organized on the basis of modern didactic requirements of Europeans technological lesson on the struggle for colonies map development.

The lesson is educational work is the main organizational form [15-18]. The lesson is central to educational work is a part of Currently, the class used in the educational process is a lesson system is carried out in the following organizational forms:

1. The lesson is mainly designed for 45 minutes and has a fixed schedule carried out through

2. Children of the same level according to the age and knowledge of each class will have a permanent group.

3. Lesson it is conducted in team and individual form directly under the guidance of the teacher.

4. Various methods depending on the content of the material being taught carried out through As part of the education system, it is definitely completed gives knowledge and is the ground for mastering the next knowledge is organized to create.

The lesson is, as mentioned above, an invariant of the organization of teaching not the shape. There is always a lesson in educational practice and pedagogical thinking looks for ways to improve 4 Various opinions and comments taking into account that the lesson meets the following general didactic requirements must give:

1. Each lesson is aimed at realizing a certain goal and must be carefully planned.

2. Each lesson should have strong ideological and political orientations need

3. Each lesson should be connected with life and practice.

4. Each lesson is productive of various methods, techniques and tools should be carried out using

5. Save every hour and minute allocated to the lesson, and make the most of it should be used.

6. Each lesson, ensuring the activity and unity of the teacher and students should give

7. Instructional tools on the content of educational materials in the lesson, it will be necessary to use technical means and computers.

8. Conducting the lesson together with the whole class individual characteristics of the student, their independence increase is taken into account.

Conclusion

The lesson is usually an introduction, re-providing new knowledge, the topics covered strengthening, formation of skills and qualifications, knowledge It is divided

into such types as application in practice, control and mixture. One or more types of lessons during one lesson in educational experience. There are also many types of mixed lessons that are conducted in a generalized manner occurs [30]. Lessons are taught in various classes, seminars, educational conferences, various discussions, interactive lessons, practical work, workshops. we give examples of many lessons, such as conducting lessons and working possible.
