Abstract. *In this article, human value in New Uzbekistan, the attention paid to each citizen, and the importance of human value in Uzbekistan's development are highlighted*

Keywords: *Uzbekistan, President, conditions, country, development, strategy, people, value.*

Based on the principles of "Human interests are above all else" and "State agencies should serve our people, not the people", the legal and legal interests of citizens are being provided in the following years in our New Uzbekistan. The fact that the ongoing humanitarian policy is being recognized by the world community makes us all happy, it adds enthusiasm and courage to our efforts. Human rights, freedom and legal interests have never been more important. In this regard, large-scale democratic reforms are being implemented in our country. It's no secret that a few years ago, the human rights situation in Uzbekistan was severely criticized by the international community and organizations, which had a negative impact not only on the prestige of our country, but also on the economic development of our country. It is worth noting that according to the results of this year's global survey, among the 15 important reforms of President Shavkat Mirziyoyev, "The guarantees of human rights have been strengthened, the forced labor, including child labor, has been abolished. He emphasized that the popular idea of "the state is for the people" is consistently gaining ground. In recent years, reforms based on openness and transparency have been implemented in our country in order to increase the dignity of a person. In particular, the scope of reforms aimed at all-round support of low-income sections of the population is expanding day by day. Considerable work is being done to increase computer literacy among the population, especially among young people, and to gradually reduce the speed and cost of the Internet. It is necessary to admit that in the following years, the reduction of poverty, the issue of women's employment, and the wide support of small business and private

entrepreneurship among the population are being effectively organized, which serve to improve the life of our people. It is not for nothing that our president puts human values first. Because in the essence of this one word, everything necessary for a person is embodied. Actually, this idea did not appear today. This is Shavkat Mirziyoyev's constant principle, his goal based on his experiences in life. Do you remember the first decisions of that person as the head of state? Yes, they were about building affordable housing in rural areas and cities in 2017-2021. The first of these decisions was adopted in October 2016, and the second in November. therefore, as soon as Shavkat Mirziyoyev became acting President in September of the same year, he gave an assignment in this regard, and it took a month or two to prepare the documents. Human dignity also means equality, secure and free living. But, it's no secret, for many years there were many restrictions related to citizenship and internal migration in our country. Getting a "propiska" in Tashkent was a pain. There were thousands of people who lived in our country for twenty years and whose children grew up, but did not become full-fledged citizens. here is one example: 1992-2007, i.e., during 15 years, only 482 people received citizenship in our republic, and by 2019 alone, 5,650 of our compatriots were so lucky. In general, society's life has become freer on all fronts, people are breathing a sigh of relief. These changes are positively evaluated by our people and the world . In the following years, a new system was created to communicate directly with the people, to positively solve their problems and concerns. The popular idea of "The state is for the people" has settled in our lives and it is getting stronger. the principle of ensuring and protecting human rights, dignity, legal interests constitutes the essence of reforms. In a word, the practical result, the benefit of a person, his dignity has become the main goal. All the reforms in new Uzbekistan are aimed at alleviating such human pains and worries and leading a prosperous life. In addition, today, large-scale reforms aimed at ensuring human dignity and legal interests are reaching a new level. especially, under the leadership of the head of our state, the idea of "New Uzbekistan - a people-friendly and humane state" is being promoted, which serves to ensure the well-being of every citizen living in our country, regardless of nationality, language and religion Recently, the decree of the President of the Republic of Uzbekistan "On the Development Strategy of New Uzbekistan for 2022-2026" was adopted. As a result of a broad public discussion, the development strategy of New Uzbekistan for 2022-2026 and the "roadmap" for its implementation in 2022, consisting of seven priority directions, developed based on the principle of "For human dignity", were approved. according to the decree, it is necessary to strengthen the responsibility and accountability of state administration bodies in solving territorial issues and to create a new system aimed at planning their strategic directions based on the principle of "The State is for the people". In this regard, in particular:

- on the development of entrepreneurship in neighborhoods, ensuring employment and reducing poverty by district (city) mayor assistants and youth leaders, based on the

results of constant study and analysis of the neighborhood establishing the practice of developing "road maps";

- development of a one-year work program of state administration bodies at all levels, including with the participation of the public, introduction of the practice of constantly announcing their implementation status;

- based on the results of the analysis of appeals in state bodies, public surveys and public discussions, developing and announcing programs on the activities of their structures in regions - districts, cities, villages and neighborhoods;

- public monitoring of the process of execution of decisions taken by state administration bodies, including the creation of a system of regularly announcing these decisions in mass media;

- tasks have been given to establish a reporting system for managers in connection with the implementation of programs adopted for each sector and region and to develop a decision to ensure the effective operation of the same system to the Cabinet of Ministers . Including, on the initiative of the head of state, the Ministry of Economic Development and Poverty Alleviation, Neighborhood and Family Support was established. A new system for working with needy families, women and youth was introduced in the country, and address-based work with those in the Iron Register, Women's Register and Youth Register was launched. Regular work is being carried out in the system of the Ministry of Employment and Labor Relations in order to improve the mechanisms of inclusion of low-income and vulnerable sections of the population in the social assistance system and expanding their participation in the labor market [5]Sufficient conditions have been created for every citizen in Uzbekistan.All conditions have been created on a large scale for young people to get an easy education, for young children to receive pre-school education in kindergartens, for adults to work in various fields, and for the elderly to receive their pension money on time. servicshowing is being done conveniently in all directions.living in the new Uzbekistan opens the door to a wide range of opportunities for students and young people like us.

In conclusion, it should be noted that every decision and order implemented by the honorable President is for the sake of human dignity. It is not for nothing that 2022 is the year of "Glorification of human dignity and active neighborhood" and 2023 is the year of "Human dignity". "year of attention and quality education" is not named. Today, the new Uzbekistan will develop based on the principles of friendly cooperation with the world community, strictly following the generally recognized norms and principles of democracy, human rights and freedoms, with the ultimate goal of creating a free, prosperous and prosperous life for our peoplewe can easily say that it is a state that consists of giving.there are enough reasons for this. At the core of every success, every milestone is the hard work, endless effort and wise policy of the President .
