Abstract: *The main aim of this article is to describe necessity and importance of innovative technologies in today's life. Not only it helps us in social environment, but also is a good assistance in blooming educational system. In addition, article discusses in detail multimedia technology which acts as a method for special intellectual activity in technological century. The use of these innovative technologies creates the most favorable chances and a good learning environment.*

Keywords: *innovative technologies, multimedia learning, modern education, appropriate methods, the role of different styles.*

The 21st century is called the information age, technological period. Everything is developing with technology. Everybody comes across technology in every step of life. In addition, technology is bringing changes to the traditional teaching of language. The use of innovative technologies in teaching system in our daily life is a great importance, thanks to its new opportunities. Being aware of communication technology and new information increases general knowledge, forms an open education system, and provides with necessary tools which help us do things easily without any problem. Moreover, these innovative technologies can good assistants for all of us to learn foreign languages.

Learning foreign languages, especially the English language is impossible to imagine without using of innovative technologies and multimedia learning tools. Surely, essential tasks for the practice of teaching or learning foreign languages contain providing chances to explain the real process of communication in the English language, and creating a good environment, which based on modern education. (1. Modern information technologies in education. Robert I. V. - Moscow School Press, 1994.)

Teaching learners with virtual atmosphere of computer-based training is one of the best methods. For example, teachers use computers to react directly and describe unknown topics clearly. It is both useful for learners and comfortable for teachers. The technical benefit of teaching English with innovative technology

allows users to record their own speech and then compare other speeches of native speakers. It helps to know weak sides during the lessons.

-images;

-phrases;

-activities;

-a global network. They can give us enough chances to learn English deeply.

Moreover, these advantages permit us to conclude that innovative technology and multimedia learning have great potential for teaching in other languages. Multimedia learning and teaching which is based on innovative technology provides limitless opportunities. For example, they are phones, television, video, bibliographies, language laboratory and others. (2. Benefits and drawbacks of controlled laboratory studies of second language acquisition. Yang L. R. Cambridge University Press, 2001. — 173–193 p.)

As we said, today's life requirements for education, where a major element of task is done by students independently, educational system can increase the process of teaching methods, learning, and schemes of work organization that will grow the ability to learn necessary programs, find needed valuable information using a variety of information resources. Modern pedagogical process seeks to use new information and the last technologies in teaching. Most of the interactive educational software for teaching English is meant at independent explanation of phonetic and grammatical parts. Useful features of these programs contain rules of pronunciation, numerous dialogues, speech and animated videos which show the voicing of sounds, videos with translation, and exercises for development of all kinds of language skills. Internet can come to the aid of foreign language teachers in the organization of different lessons which include and searching in online resources. Useful information, training materials, and a good virtual environment are very important for future specialists. (3. Problems of application of multimedia technology in higher education. Frolov N. H. — Nizhny Novgorod, VSPI, 2000. — 96–98 p.)

These innovative technologies can help teachers in the choice of more interesting and numerous educational materials to give a good meaning for each student. The use of innovative and different videos in the learning process permits for increases during the action. Multimedia and innovative technologies have an essential role which has a number of advantages and strategies compared with other information technologies. They are:

-The first one is the pedagogy which means continuous expansion of comfortable and methods of modern education in today's conditions.

-The second advantage provides chances to identify and support learners with linguistic, that is English abilities.

-The third advantage provides the basis of distance teaching and learning.

-The fourth advantage provides best means of computer that is the world of Internet and an essential communication network.

-The fifth advantage creates a friendly language environment which allows to study of foreign languages. When learners are aware of these foreign languages, they can increase their own independence and responsibility. In addition, FL training is connected with learners' goals and interests. It allows learners to enter into a good environment of FL.

-Innovative technology has limitless opportunities for creation of learners' secret abilities. During the lessons, it helps students to create their own unknown ability. (4. New teaching and information technology in the education system. Polat ES — Moscow, Education, 2000.-45–46p.)

This article shows that the role of innovative technologies is very important and needful for every learner in today's educational system. It provides us with the tools of computer that create unlimited chances, the best methods, interesting exercises and a good foreign language technological environment. Brief saying, we can say that we cannot imagine not only our life, but also blooming educational system without innovative technologies.
